A. L. ROBERSON ENTERS RACE FOR COUNTY JUDGE

A. L. Roberson, of Jasper, authorizes his announcement as entering the race for Judge of Marion County, subject to the will of the Democratic party in convention or primary.

Mr. Roberson has been contemplating for several weeks entering the race, and so he shies his castor into the ring and is ready to meet all comers.

As Clerk and Master of Chancery Court for many years he is well known to everyone in Marion County, and has made a thoroughly competent official. At present, and in addition, he is serving a one-year term as Road Commissioner in this county, and is making good at that also. In fact he is taking a keen interest in the improvement of the roads, and trying his best to give the Cameron law a fair trial towards road improvement in Marion. What record he would make as a County Judge is a question, but if the work he does is kept up at the same standard, no doubt he would make a very capable judge and one looking to the best interests of the county always.

This Is Our Winter of Test

SERVING food is a local problem for each community. Prices and definite rules for every one cannot be formulated. It is a duty for each one to eat only so much as is necessary to maintain the human body healthy and strong. This winter of 1918 is the period when it is to be tested here in America whether our people are capable of voluntary individual sacrifice to save the world. That is the purpose of the organization of the United States Food Administration—by voluntary effort to provide the food that the world needs.

U. S. FOOD ADMINISTRATION.

NEED BIG HERDS

Europe's Meat Supply Must Come From America.

Warring Nations Have Depleted Live Stock at Enormous Rate, Even Killing Dairy Cattle For Food.

American stock breeders are being asked to conserve their flocks and herds in order to meet Europe's tremendous demands for meats during the war and probably for many years afterward.

The United States food administration reports that American stock raisers have shown a disposition to co-operate with the government in increasing the nation's supply of live stock.

Germany today is probably better supplied with live stock than any other European nation. When the German armies made their big advance into France and then retreated virtually all the cattle in the invaded territory—approximately 1,800,000 head—were driven behind the German lines.

But in England—where 2,400,000 acres of pasture lands have been turned into grain fields—the cattle herds are decreasing rapidly. One of the reasons apparently is the declining maximum price scale adopted by the English as follows: For September, \$17.76 per 100 pounds; October, \$17.28; November and December, \$16.08; January, \$14.40. The effect of these prices was to drive beef animals on the market as soon as possible.

In France the number of cattle as well as the quality have shown an enormous decline during the war. Where France had 14,807,000 head of cattle in 1913, she now has only 12,341,900, a decrease of 16.8 per cent. And France is today producing only one gallon of milk compared to two and one-half gallons before the war. Denmark and Holland have been forced to sacrifice dairy herds for beef because of the lack of necessary feed. Close study of the European meat situation has convinced the Food Administration that the future problem of America lies largely in the production of meat producing animals and dairy products rather than in the production of cereals for export when the war will have ceased.

BRITISH GOVERNMENT HELPS PAY FOR BREAD

There has been much misunderstanding about the bread program in England. It is true that the Englishman buys a loaf of bread for less than an American can, but it is poorer bread, and the British government is paying \$200,000,000 a year toward the cost of it.

All the grain grown in Great Britain is taken over by the government at an arbitrary price and the imported wheat purchased on the markets at the prevailing market price. This is turned over to the mills by the government at a price that allows the adulterated war bread loaf of four pounds to sell at 18 cents, the two pound loaf at 9 cents and the one pound loaf at 5 cents.

In France, under conditions somewhat similar, but with a larger extraction, the four pound loaf sells for 16 cents.

MAKING MEATLESS DAYS PERMANENT.

In the meatless menu there is a fertile field for developing new and nourishing dishes, according to E. H. Niles, writing in the Hotel Gazette, who believes that the present shortage of meat and fats will not end with the coming of peace, but may grow more acute and continue for five or six years, thus making it worth while to develop menus of grain, vegetables and fish on a more or less permanent basis. Meat can be replaced by cereals and other protein foods, or may be served in very small portions as a flavoring for other food. In making up meatless menus this author finds our American Creole and southern cuisine a broad field for investigation.

Whitwell.

Special to the News.

Everybody is busy gardening, trying to head off the high cost of living.

The U. M. W. of A. is still on the boom.

Glad to see "Uncle Blue," in the ring again. Come on, "Uncle Blue" and bring that fish. I have plenty of corn dodger and while the young lady fries fish we will sit and talk over the soup bone. Don't be afraid to come, as everything is peaceable and I don't think you will have to run thru the pines.

If you want to see Hugh Shirley smile, just ask him where he got that paper sack Thursday night.

Jno. Shirley says he doesn't need any musical instrument. All he has to do is sit before the fire and sing "Bye-o-baby."

Jas. Payne seems to be worrying over a certain girl in Whitwell. Cheer up, old boy, I used to be girl struck and know what it is.

Come, on, "L. C." with another good piece.

There are a good many people leaving Whitwell. Hope they are not uneasy in any way.

Brown Eyes.

Swift & Company Publicity

At a recent hearing of the Federal Trade Commission there was introduced correspondence taken from the private files of Swift & Company, which showed that the Company had been considering for some time an educational advertising campaign.

The need for this publicity has been apparent to us for several years. The gross misrepresentation to which we have recently been subjected has convinced us that we should no longer delay in putting before the public the basic facts of our business, relying on the fair-mindedness of the American people.

The feeling against the American packer is based largely on the belief that the income and well-being of the producer and consumer are adversely affected by the packers' operations, resulting in unreasonably large profits.

Swift & Company's net profit is reasonable, and represents an insignificant factor in the cost of living.

For the fiscal year 1917 the total sales and net profit of Swift & Company were as follows:

Sales
\$875,000,000.

Profits
\$34,650,000.

This is equivalent to a \$3,465 profit on a business of \$87,500.

If Swift & Company had made no profit at all, the cattle raiser would have received only one-eighth of a cent per pound more for his cattle, or the consumer would have saved only one-quarter of a cent per pound on dressed beef.

McRoberts, Ky.

Special to the News.

Wish to say a few words to "Green Lizard," of Tennessee. I wish you to join hands with me and help win the great war. We should be, and I am, for "Uncle Sam" today, tomorrow, and all the time to come, and I feel that you are the same. For this cause we should not sling mud at each other thru our writings. I mean to state facts and not faults from McRoberts, and wish you to do the same from Roope, so hear we go.

We are having some cool weather here now. Gardening is all the talk but little is done.

No. 2 mines are running everyday when they can get the railroad cars.

C. J. Learn, blacksmith at Mine 214 for Consolidated Coal Co., has bought some fine hogs expecting to ship them to Roope, Tenn.

We are informed that Frank Newsom, of Seco, has departed for Tennessee.

J. A. Ricketts, time keeper for the Consolidated Coal Co., will move to what is known as Chaplin Branch. Much regret is felt by the writer for the loss of Mr. Ricketts as a neighbor.

R. M. Oglewin is on the day shift now as repair man at No. 214 shop.

J. M. Rice, barn boss at No. 214 barn, has a very sick horse, but its recovery is expected.

J. M. Johnson, one of our outside merchants seem to be somewhat wool-gathered over our food administrator's rules, but he has got this word down pat: "Boys, no more flour for 60 days." Some of the boys, of course, were raised down in Middle Georgia where ash cakes were the order of the day, and Mr. Johnson doesn't seem to worry them, As to the writer, corn bread is a favorite if it takes that to win the war. However, it seems funny to me to recall my boyhood days, altho' any man isn't any better than a boy in that respect.
